KEY DESIGN CRITERIA

1. Automatic sliding doors are to be positive latching type (unless inside a suite) and capable of resisting the passage of smoke. Breakaway is not required for automatic doors. Latching is not required for manual sliding doors if located within a suite.

2. Room exhaust system shall comply with NFPA 99 6.4.1 (smoke control) and tie-in with the building automation system (BAS) to monitor pressure, temperature, and humidity.

3. Trash, linen, red bag trash, etc. cannot exceed 32 gallons in a 64 sf area.

4. Windows provided for viewing from scrub sink into room.

5. 5'-0" sliding door is offset to allow for patient transfer on patient left side of bed.

6. Requirements for equipment and med gas columns to be coordinated with CC design team and/or user group.

7. Alcoves to be less than 50sf and have smoke detection.

8. Light(s) to have battery power back-up.

9. Sprinkler heads to be concealed type.

10. Where special procedures will be performed (i.e. Ortho., Cardio., Neuro., etc.) minimum square footage requirements are to be coordinated.

11. Line Isolating Monitors (LIMs) are to be self testing / calibrating type.

12. Coordinate installation of all Sharps Installation and Alcohol-Based Hand Rub (ABHR) with the most recent installation guides.
