Introduction

**SIGN PROGRAM PROMISE**
For most, navigating an unfamiliar medical facility when faced with an illness or emergency situation can be a stressful, if not fear-inducing, scenario. Through its brand promise at left, Cleveland Clinic commits to "stand as the polar opposite of fear" (*House Style Guidelines, 07*).

**SIGN STANDARDS MANUAL**
The purpose of this Manual is to define the system, specifications, and construction details for each sign type of the program. This document serves as a resource for both internal personnel and outside contractors to aid in the selection, fabrication and implementation of interior signs. The details outlined throughout this guide should be followed carefully to maintain absolute consistency in construction, materials, graphic language and messaging.

This guide is divided into five sections:

**Section 1: Introduction** Provides an overview of the Cleveland Clinic House Style, defining its brand elements including typography, colors, and signature. Defines the philosophies, nomenclature and graphic elements of the Interior Sign program. Includes contact information for all signage requests.

**Section 2: Sign Selection Charts** Presents all sign types in visual hierarchies to guide the selection of signs appropriate to the information communicated, quantity of messages and architectural contexts. Provides two categories of selection: by Function and by Application.

**Section 3: Sign Drawing Pages** Individual pages detailing each sign type or element, including design intent, colors, text, dimensions, materials, construction and mounting specifications.

**Section 4: Elevations** Illustrates typical elevations per architectural context. Elevations are cross-referenced on Sign Drawing Pages; multiple sign types may point to common elevations.

**Section 5: Appendices** Appendix A includes photographic examples of specific sign applications, cross-referenced from Section 2 Charts.

Complete Confidence

At a time of stress and uncertainty, patients and their families can take comfort and find peace of mind that their hopes for the best outcome and best care will be realized at Cleveland Clinic.

As a direct extension of its brand, the Cleveland Clinic Interior Sign program is designed to "project confidence and justify the confidence of our patients and their families" by providing clear, consistent and universally-accessible wayfinding information throughout all system facilities.

The Cleveland Clinic Interior Sign program:
- Sets up a clear organizational system of wayfinding information, whereby visitors to system facilities have consistent expectations for these tools;
- Integrates wayfinding information within the hospital environment so that signage is both functional and minimal;
- Meets guidelines for accessibility and safety by providing information for all visitors regardless of ability;
- Provides a quality sign system that may last over time through the use of changeable messages; and
- Supports and communicates the CCF brand promise through the use of consistent brand elements, well-crafted materials and consistent messaging.

Signatures

SIGNATURE

The Cleveland Clinic signature consists of the symbol and the proprietary wordmark “Cleveland Clinic.”

![Cleveland Clinic Symbol and Wordmark](image)

The Symbol

The Cleveland Clinic brand identity was designed to reflect our heritage as a medical pioneer and our position today as a premier healthcare institution.

The Shape

Four cornerstones in the symbol represent the facets of our mission: patient care (clinical and hospital), education and research. They honor our four founders. Finally, the four corners symbolize our fundamental values: quality, innovation, teamwork and service. The center of the symbol represents a window to the needs of our patients and stands for our focused commitment to putting “Patients First” in all we do.

The Colors

The colors of the Cleveland Clinic symbol are inspired by our heritage. The green is based on the Cleveland Clinic Foundation signature and is traditionally associated with medical science. The blue is the color of the Cleveland Clinic Health System signature and suggests limitless possibility.

SIGNATURE

Children’s Hospital is a sub-brand of the Cleveland Clinic. Sub-brands are linked to the Masterbrand through color and typography, and use the Cleveland Clinic name as an endorsement. These elements are arranged in a fixed relationship that mirrors the basic visual structure of the Masterbrand as closely as possible.

![Children's Hospital Symbol](image)
Abbreviated House Style

Typography

PRIMARY TYPEFACE

The primary Cleveland Clinic typeface, News Gothic BT, is a sans serif typeface that is highly legible when used in headlines or body copy. The weight “Demi” is used on all interior signage messaging with no substitutions permitted. Sign fabricators are to purchase the font for production; this font is available for purchase at fontshop.com.

DEMI

ABCDEFGHIJKLMNOPQRSTUVWXYZ

OH Detail

Mounting Detail

SCALE: 1-1/2" = 1'-0"

Drill holes & countersink to accommodate a #10 x 2" FHWS Phillips head screw. The size of the counterbore will vary depending on the thickness of the material. A 1/4" x 2" hole is drilled through the material to accommodate the screw.

1/4-20 x 4" threaded machine screws are used to mount the sign to the ceiling or wall.

Screw heads are painted to match the background color of the sign.

1/2" x 1-1/2" counterbore with 5/32" hole drilled through.

3/8" x 2-1/2" pocket
